Supporting the agriculture industry with superior solutions to enhance crop growth

Protect your crops with us

For over 30 years, we have been a global leader in physical crop protection; our products help growers yield fuller, higher-quality, and more consistent harvests.

Grow your crops up to **5°C warmer** than the exterior temperature

Crop Protection Brands

Our wide range of brands offer customized solutions that excel in a variety of applications and environments

Versatile crop and soil cover that helps improve yield, quality, and harvest time in a variety of challenging environments

Versatile crop and soil cover that helps improve yield, quality, and harvest time in a variety of challenging environments

Quick install climate and pest protection with an advanced system for cold weather

Strong and durable fabric that helps maintain temperature stability in harsh climates

Agriculture Center of Excellence in Europe

Biesheim Facility

Berry Global's Biesheim facility is the Center of Excellence for Agriculture

To reinforce our leading position as a worldwide solution provider, we have chosen this strategically-located facility that has been serving the agriculture market for more than 35 years.

By partnering the most advanced technology with our strong industry expertise and knowledge, we offer market-leading crop covers that enhance growth, improve yield and quality, and cut time to harvest for a multitude of crops.

Manufacturing

In-House Capabilities:

- Patented non-woven technology
- Service-first philosophy
- Customized solutions available

Technology Platform Established:

- Lean manufacturing techniques
- Constant quality testing - on the line and in the lab
- ISO 9001 / ISO 140001 / OHSAS 18001 accreditation
- Two in-house gluing lines

Partner of Choice Commitment

We are committed to providing the highest quality products and service to our agriculture customers.

APPLICATIONS

We have been a global leader in customized crop protection solutions for:

- Open Field
- Greenhouses and Plastic Tunnels
- Tunnels
- Mulch
- Garden Nursery

Open Field

Our open field solutions help protect and improve yield and crop quality.

Suitable for:

Tubers

Root and Bulb Vegetables

Fruit Vegetables and Soft Fruits

Leaf and Stem Vegetables

Stem Crops (robust)

Brassica Crops

Leguminous vegetables

Ornamentals

Features and Benefits

CUSTOMIZED SOLUTIONS

Single and glued fleece, up to 30m wide, available with a range of thickness

EASY AND RELIABLE INSTALLATION

Reinforced edges help ensure rapid coverage and unwinding. Compatible with automatic processes

IMPROVED YIELD AND CROP QUALITY

Effective and reliable physical protection againsts pests and harsh climatic conditions

EFFICIENT TRANSPORT AND STORAGE

Folded in 1.6m rolls, supplied in pallets

Greenhouses and Plastic Tunnels

Protect and grow your crops the easy way.

Suitable for:

Tubers

Root and Bulb Vegetables

Fruit Vegetables and Soft Fruits

Leaf and Stem Vegetables

Stem Crops (robust)

Ornamentals

Young Plants

Features and Benefits

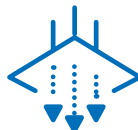

IMPROVED YIELD AND CROP QUALITY

Stable micro-climate and effective protection against pests

EASY AND RELIABLE INSTALLATION

Easy manual covering for confined spaces

HIGH PERMEABILITY

Controlled light and water transmission

DURABILITY

Re-usable protection with a robust structure

Mulch

Protect against weed control and improve soil temperatures.

Suitable for:

- 
Fruit Vegetables and Soft Fruits
- 
Leaf and Stem Vegetables
- 
Ornamentals
- 
Young Plants

Features and Benefits

- 

IMPROVED YIELD AND CROP QUALITY
Creates a warmer, more robust soil environment
- 

HIGH WATER AND AIR PERMEABILITY
Maintains the quality of soil and avoids surface water pooling
- 

WEED REDUCTION
Blocks light to inhibit weed growth
- 

DURABILITY
Can remain on fields for up to three seasons

Tunnels

Help your crops grow effectively.

Suitable for:

- 
Fruit Vegetables and Soft Fruits
- 
Leaf and Stem Vegetables
- 
Root and Bulb Vegetables

Features and Benefits

- 

IMPROVED YIELD AND CROP QUALITY
Localised micro-climates with sufficient
- 

EASY AND RELIABLE INSTALLATION
Reinforced edges for ease of use
- 

HIGH PERMEABILITY
Reduced pooling, avoiding tunnel deformation
- 

DURABILITY
Re-usable protection with a robust structure

Garden Nursery

Additional protection for young plants.

Suitable for:

- 
Ornamentals
- 
Young Plants

Features and Benefits

- 

IMPROVED PLANT GROWTH
Protection against harsh rain and wind
- 

INCREASED PLANT SURVIVAL
Exceptional thermal protection, delivered by veils of up to 60gsm
- 

HIGH PERMEABILITY
Controlled light and water transmission

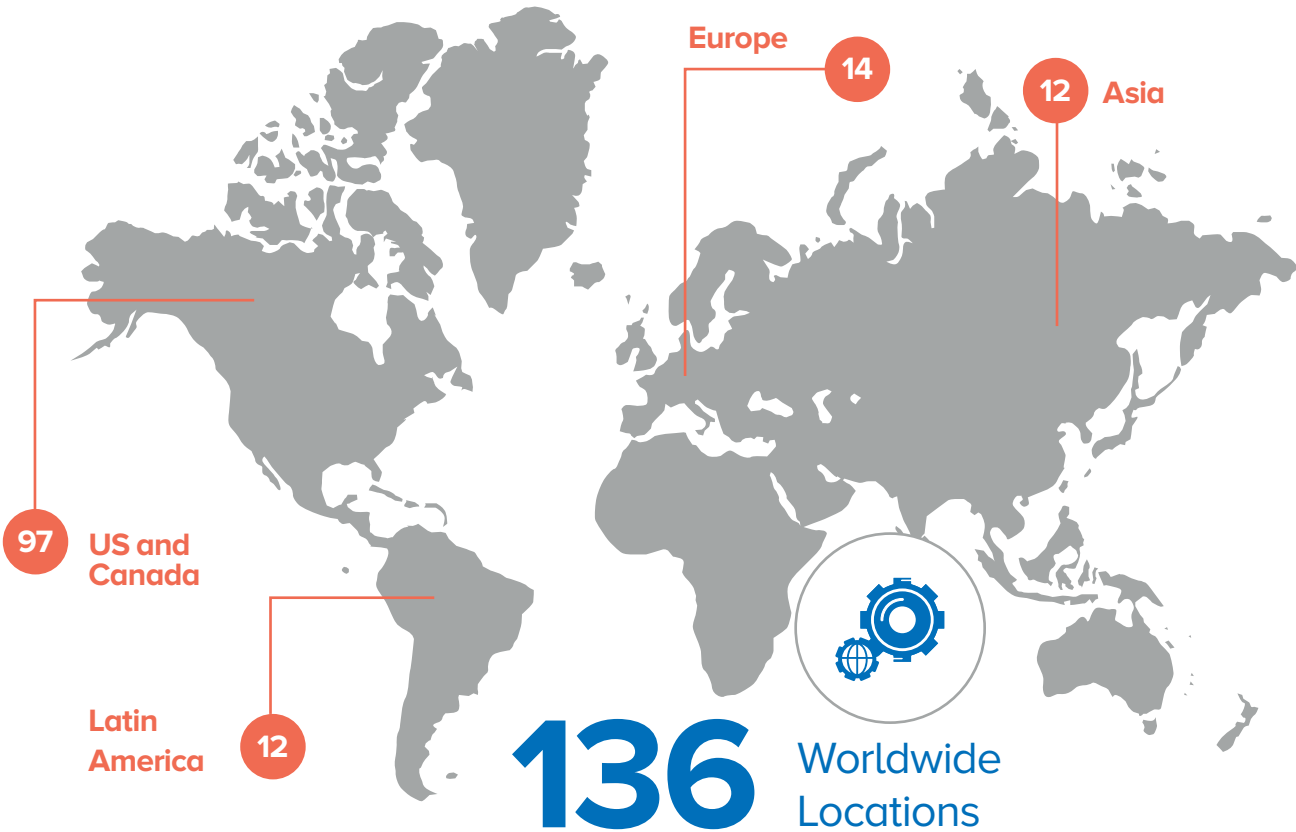

Always advancing to protect what's important.

We are always advancing to be the essential partner in key markets around the world by providing high performance solutions to protect and create value for our customers.

Global Facilities

At Berry, our goal is to meet and exceed the demands of our customers around the globe. Our ever expanding footprint allows us to work with you both near and far.

Solutions to enhance crop growth and protection

Our wide product range offers the strength, thermal protection, and thickness needed to improve your crop growth.
